REASONS FOR ALLOWANCE

Claims 10 and 14-18 are allowed.

Reasons for allowance

1. The following is an examiner's statement of reasons for allowance: upon reconsideration of the case as a whole in light of applicants arguments filed in the brief, the application is allowed. The closest prior art to the claims as amended is Nissan Chemical Ind., Ltd, WO 98/39253, as evidenced by Watanabe et al, US 6,296,943. The prior art does not disclose nor fairly teach the optical elements as now claimed. As noted in the Brief (pages 5 and 6), the prior art does not disclose optical elements as claimed, there is no evidence that the prior art would result in the claimed structure nor evidence that the claimed structure in the sol would be destroyed in forming the optical element. Nissan and Watanabe et al does not disclose nor adequately motivate one skilled in the art at the time of applicants invention to modify the compositions of Nissan and Watanabe et al claimed as coating of nuclei sol particles with alkali component containing diantimony pentoxide as claimed.

Newly cited Koyama et al reference is a later filed application with one common inventor. Where an ODP rejection is the only rejection remaining, said rejection may be withdrawn in certain fact situations. Attention is directed to MPEP 804(I)(B)(1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
